

DEVON WASTE MANAGEMENT LTD

LANDFILL TAX CREDIT SCHEME

It is anticipated that approximately £120,000 will be available in the current financial year ending in March. Projects can only be supported up to a maximum of 90% of project costs, including professional fees. Devon Waste Management Ltd has developed the following criteria/policy against which eligible projects would be assessed for possible support utilising the funds available.

- 1) Enhancement of the natural environment in the vicinity of Devon Waste Management Ltd's site at Deep Moor relating specifically to:-

Biodiversity
Habitat Creation
Interpretation of the natural environment
Facilities for enjoyment of the environment
- 2) Community led amenity projects in the vicinity of Devon Waste Management's landfill or transfer station facilities in Devon.

Community led projects can include restoration and maintenance of buildings open to the public for religious worship or which are of historic or architectural interest or reclamation of land where its use is prevented by a previous activity.

Note: In the vicinity means up to 10 miles from a Devon Waste Management Ltd landfill or transfer station facility. Please see the company's web site for details of the location of its facilities.

Devon Waste Management Ltd do not require a formal application process, however, proposals should be thoroughly costed with a project expenditure plan including a timetable of spending and ideally supported by the Parish/District/Town/Parochial Council in that area and explaining the benefits the project would provide to the Community. An initial consultation with the company may help to confirm whether or not the project complies with our criteria.

All projects must then have ENTRUST approval and be registered with an Environmental Body. This does require a formal application to an appropriate Environmental Body.

An Environmental Body which has been frequently used by DWML funded schemes is:-

SWEET (South West England Environmental Trust)
Victoria House
51 Victoria Street
Bristol BS1 6AD
Telephone: 0117904 5858
Contact: Sally Campbell or Alison Southern

Alternatively, projects which have already received ENTRUST approval are welcome to approach the company to establish if funding will be available.

The Environmental Body will help the project organisers through the ENTRUST application process. If Devon Waste Management Ltd is unable to contribute to the project, the Environmental Body may be able to secure funding from other, local landfill operators.
